ABOUT ME

Early on in my film degree I gravitated towards prop making and design before fully understanding that what I was loving could be a job. I finished my degree confident that the it was the place for me.

I leaned further into the Art Department as a freelancer in 2019 after meeting an art director and designer who took me under their wing as an assistant.

I have since jumped at every opportunity to expand my skills in design, prop making, creative problem solving, team communication and logistics. I am eager to continue obtaining skills as a buyer/set dresser and am excited to work towards a production design role in the future.
